

# elcometer® 3233 Pfund Thickness Gauge

Can be used in accordance with: ASTM D 1212-D, NF T30-125

This instrument consists of two concentric cylinders, one sliding inside the other. A spherical glass lens is fitted to the end of the central cylinder and when pressed into the wet film it leaves a trace.

The diameter of this mark varies depending on the thickness of the coating, which can easily be assessed from the conversion table supplied with the instrument.

- Ideal for measuring the thickness of translucent products (varnish, oils etc.)
- Measurement range of 2.25-360  $\mu\text{m}$

## Part Number

### Model

Elcometer 3233/1  
Elcometer 3233/2

### Description

Elcometer 3233 Pfund Thickness Gauge - Aluminium  
Elcometer 3233 Pfund Thickness Gauge – Stainless Steel

### Part Number

K0003233M001
