

P130 Wall Tie Metal Detector

Having been approached by a contractor engaged in replacing wall ties, we designed an instrument specifically to identify the location of the wall ties. A product of this type has to be fast, stable and accurate. Require no zeroing, be easy to use and extremely tough.

There are many cheap metal detectors on the market today, but the P130 Wall Tie Metal Detector out-performs them all in speed, ease of use and reliability. The P130 will rapidly and precisely locate mild steel wall-ties and also makes an excellent stud locator / stud detector, making it an extremely versatile instrument

Approximate detection ranges Mild steel / galvanised fishtail: 130mm

Also used in the Timber Industry

Dimensions

Main unit	183 x 110 x 78mm (in case)
Search head diameter	22cm
Weight	850g

Technical Specifications

- **Fast and accurate** :the strongest signal is in the middle of the search head making it easy to pin point the wall ties. A clear audio tone assists in the quick and precise location without the need to keep looking at the meter.
- **No need to re-zero** :The P130 Wall Tie Metal Detector is very stable in all weather conditions.
- **Designed with the needs of the operator in mind.** Easy to use, built to last complete with leather case and shoulder strap.
- **Single handed operation** For safety and convenience when working on scaffold or ladders
- **Lightweight search head.** Separate lightweight search head for, fatigue free work
- **Dual-purpose Kits also available** For locating phosphor-bronze and some types of stainless steel, rebars and bed joint reinforcement.
- **The Imp can also be used to find wiring in plaster walls.**

The P130 Wall Tie Metal Detector - Advanced technology for precise location of wall ties and studs

- The P130 is supplied with leather case and shoulder strap
- Designed specifically to **save money for timber companies** who need to find metal (including shrapnel) in timber of all types.

The P130 is easy to use, reliable and very rugged, built to give years of professional on-site use

- High-impact ABS control unit in tough leather case for years of use
- Search coils encapsulated in epoxy resin for unmatched ruggedness
- High-grade TNC plug and socket for connecting search head and electronics
- Single control knob for on/off and sensitivity / backoff control
- Built-in loudspeaker for clear audio signal; Standard 3.5mm stereo jack socket for headphones if required
- Analogue meter for signal strength and battery state
- Easily accessible battery compartment
- Operates from four standard AA-size batteries
- The 4S search head (optional extra) allows location of reinforcement bars and bed joint reinforcement
- Supplied with tough foam lined storage / carry case
- All our wall tie locators carry a full one year parts and labour guarantee
